SteamMaster was the initial Emergency Services contractor that worked on the loss in late 2018. The interior of the unit was tested for asbestos abated last year by a separate contractor. It recently incurred another frozen pipe water loss on 1/1/20 due to a boiler failure. My scope of work is to restore residence to pre-water loss condition. The unit is un-insulated at this time and the immediate goal is to repair the broken water lines, insulate the unit and restore the permanent heating to the unit ASAP. Native Electric has applied for the electrical Permit to replace the Electrical Service Breaker Panel and any wiring/fixtures which were in contact with any water/moisture. |
