These upgrades will include a new 2.5MW utility transformer and new service connection from Holy Cross. New service will include the installation of a 3000A outdoor CT meter and service rated automatic transfer switchgear. Additional outdoor gear to be installed by contractor includes 900kW Genset and Tap Box. \nThe secondary distribution service includes routing power from the outdoor CT/ATS gear underground to the existing bus bam. Power supplies will be routed through roof mounted conduits to a 3000A indoor Main distribution switchboard in the electrical room. The new Main distribution board will feed to the existing bus maintenance facility panel as well as the (4) proposed standalone EV chargers to be installed by contractor inside the bus depot. \n*Please includ |
