STABLE VALUE FUND

VANTAGETRUST PLUS FUND - to provide a highrate of income consistent with preservation of capital. The Fund pursues this objective by investing in Guaranteed Investment Contracts (GICs) issued by insurance companies and in high-quality bond portfolios with an insurance contract to provide stable pricing. The maturities of the Fund's GIC holdings are spread across future periods (up to seven years) to control the risk of reinvesting a large amount of maturing proceeds in one period. This staggered maturity structure, coupled with the opportunity to reinvest frequently, allows the PLUS Fund's yield to follow the general direction of interest rates, albeit at a lower pace.

ASSET ALLOCATION FUND

MODEL PORTFOLIO FUNDS - seek long-term total return from income and capital gains. The five Funds vary by risk level and, therefore, by return potential. Each Fund invests in a specific target allocation of Vantagepoint Funds that is regularly monitored and periodically rebalanced with the goal of ensuring a consistent risk-return profile. Each Model Portfolio Fund is designed to offer investors a complete investment program, depending on their needs.

¹ Because there is no trading market for investment contracts, PLUS Fund returns consist of yield only. Returns under one year are annualized for ease of comparison with other stable value investments.
