Instructions for calculating ELECTRICAL permit fees:

The Electrical permit fees listed in this section are mandated by the State of Colorado, Colorado Revised Statute §12-23-117(3). They are subject to review and adjustment annually. Fees are based on *either* RESIDENTIAL or ALL OTHER FEES. Do not use *both* categories to determine your fees. Please note the Town of Vail still requests you list the valuation of work on RESIDENTIAL permits as we report on this data. The State of Colorado allows local jurisdictions to charge up to 15% above their mandated fees as listed below.

Plan Review Fee: A plan review fee of 25% of permit fee will be added to all permits

Inspections: Permit fees include TWO inspections only. For ALL additional inspections, including re-inspection for corrections issued by the electrical inspector, a 105.00 fee is required. This fee must be paid before any additional inspections will be performed.

Construction Use Tax: See formula listed on page 1 in the Building Permit Fees section. Construction use tax will be applied to any electrical permit with a valuation exceeding \$10,000.

Will Call: \$5.00 applied to every electrical permit. When calling for your inspection, simply state that you would like "Will Call" and leave the best contact name and number. The inspector will call you on his or her way to your site.

Section A. RESIDENTIAL: This fee (based on the enclosed living area only) includes construction of, or remodeling or addition to a single family home, a unit in a duplex, a condominium, or a town house. *If you are only providing or changing a service and not wiring any portion on the above, see section 'B' on page 5 for correct permit fee.*

Use this chart for a service connection, a temporary meter, and all commercial installations. Such fees shall be computed as follows: (See 'C' below for the permit fees for a mobile/modular home and travel trailer parks).
