

Best Practices for 2021 IECC

 **XcelEnergy®** **September 27, 2022, from 8:00 – 12:00**

Training to Support the Design Community with Energy Code Compliance

Free energy code training on the 2021 IECC.

September 27, 2022, 8:00 am-12:00 pm

Grandview Room
Lionshead Parking Structure
350 S Frontage Road W.
Vail, CO 81657
Continental style breakfast will be provided.

Join us as we take a look at best practices for various topics found in the 2021 IECC. This class is designed from the perspective of architects, designers, contractors, and builders. We will take a look at the following topics:

- What should be placed on the plans, and what should that look like. What can I do to assist with getting my project reviewed faster?
- Rethinking how to build. The 2021 IECC has items that will make rethink how to design and build. We are going to look at areas that both the IRC and the IECC have requirements and what you can do to satisfy two requirements with one design.
- How does the 2021 IECC change multi-family designing and construction? We will explore how the new code addresses multi-family construction in a favorable way.

Join us September 27th to have the conversation and get better acquainted with the requirements of the 2021 IECC. Let's work on this together. Bring your questions, thoughts, and an open mind on how to navigate this journey of the 2021 IECC.
